

Campaign for a Better Grant

Harrow Council is in a precarious financial position caused, in part by its government settlement from central Government. The borough is at the lowest end of the funding formulae which means the council has been forced to cut services to the bone. It is not fair on those who choose to live here.

We, the undersigned, urge the Minister for Local Government, to listen to our plea and give us more funding.

HCTC says: *"Harrow receives a Government Support Grant that is significantly lower than the London average. This has prevented the Council from setting an affordable level of Council Tax for many years, and led to under-funding of services, causing misery and hardship for the Borough's most vulnerable residents. We demand an equitable grant."*
